

# Breast Augmentation Through Hypnosis Research

All women have a history for breast manipulation to some degree. They know the growing feeling, the changes in hormonal and physical condition. Breast size increases during sex, menstruation and when gaining weight develops a certain degree of broad mindedness in the female's self-image of what her body can achieve and confirms that results of breast manipulation are possible.

*Research spanning decades:*

- 1971, February 28. - Peter H.C. Mutke, M.D. Presented his results to the "*Department of Neuropsychiatry*," University of California, Los Angeles.
- 1974 - James E. Williams reported breast enhancement through hypnosis - "*Journal of Sex Research*". Out of **thirteen volunteers** they averaged increases of **over 2 inches** in the circumference of their breasts (2 cup sizes).
- 1975 R.D. Willard of '*The Institute of Behaviour and Mind Sciences*' claimed results of **85% from a 12 week study** showed breast enlargement, correctness of **lopsidedness** and increases in **firmness**.
- 1977, Staib, A.R., and Logan, D.R.. - Hypnotic Stimulation of Breast Growth. "*The American Journal of Clinical Hypnosis*".
- 1977, Dr Willard. - "*The American Journal of Clinical Hypnosis*," achieved an average **1.44 inch increase** in breast size for his **22 volunteers**- Every single volunteer who did the study with **one breast smaller than the other** found them to be **equal in size** at the end of the twelve weeks.
- 1979, Wilson, Donald L. MD, - "*Total Mind Power*" book- documenting breast enhancement hypnosis with **very impressive** results.
- 1997, Dr Roy Beran, a neurologist at the '*Adelaide Childrens Hospital*', reported his results at the *National Convention of Hypnotherapists*. He found success in increasing **lopsidedness** in female breasts by increasing the size of each breast by varying amounts.
- 1980 Dr Milton Erickson reported increasing the breast size of a **teenage girl** who had previously not gained success from **hormones** given to her by her Doctor.
- In a study of over **800 women 80% saw gains** of over **two inches**.
- 2002 University of California was reported by BBC Television about their "**great success**" in breast enhancement research through hypnosis.
